

TWIN METALS HONORS CONSTRUCTION TEAM AT SUMMER OPEN HOUSE

Twin Metals Minnesota (TMM) hosted a community open house June 21 to honor the workers and businesses who worked through harsh winter conditions to construct TMM's new core storage facility in Ely, Minn. At the event, TMM CEO Andres Morel noted that the 62-member construction team worked over the course of 80 days to complete the building on-time, on-budget and, most importantly, with no construction-related injuries. To further recognize the construction team's success, TMM donated \$5,000 to the Ely Area Food Shelf.

More than 300 guests attended the open house, enjoying summer picnic fare and touring the impressive 16,800 square-foot core storage facility. TMM staff members answered

questions about the new storage facility, how TMM generates core samples from its drilling activity and TMM's project development efforts overall. Twin Metals would like to thank all who attended the open house for helping celebrate the completion of the new facility and for showing their continued support for the Twin Metals project. See more photos from the open house and learn more about the Twin Metals project at www.twin-metals.com/newsroom/photos/.

Twin Metals Minnesota CEO Andres Morel and Vice President of Public and Government Affairs Bob McFarlin thank the workers for their hard work on the facility and the community for their continued support at the event.
